Snehaa Bangaroo - Sustainability Engineer
They have well integrated in our team.

WE LAUNCHED IN 2021

Our 3D Interactive Building User Guide - the innovative tool which increases buyers' experience while boosting sales and rental for property developers.

OUR PROJECTS

2021 has been a busy year. We have completed some major projects and started some others.

We completed several projects this year; the renovation of Maritim Resort & Spa, 'Les Promenades d'Helvetia' Block E and F, Lavastone's new office in 246 ECC Building, the renovation of 'La Citronelle' Restaurant at Constance Belle Mare Plage Hotel to name a few. We are now excited to start next year with the construction of Telfair North project in Moka Smart City, where we are also providing LEED Consultancy and BIM Management Services.

Our R&D team was very busy this year, with a number of BIM apps and plugins developed, our digital twin implementation under way, rulesets customisation on our clash detection platform and integrating BIM viewers with asset management and maintenance software. They will have a very challenging next year as we will embark on BIM for fabrication and generative design.

2022

Despite Covid-19 and its new variants around, we have an optimistic look at next year. We hope to be able to accelerate our R&D to provide better services to our clients and the construction industry with new digital tools which will improve its overall efficiency. We also look forward to work on a few exciting projects that we secured in late this year, including the renovation of Hilton Hotel.
