

PRODESIGN

SUSTAINABILITY & MEP ENGINEERS

Your first choice engineering partner

INTRODUCTION

Prodesign is working on the improvement of the Construction Industry by developing Digital Twins of buildings and the application of AI and IoT. This is a project partly funded by the Mauritius Research and Innovation Council (MRIC) under the Pole of Innovation Scheme.

We are looking for applicants who want to embark on this innovative and challenging project.

JOB DETAILS

Requirements

- Bsc, MSc or PhD in the field of IT, technology or relevant to AI and IoT
- Experience and deep understanding on development of IoT solution with any cloud provider would be an advantage
- Knowledge on Cloud based solution, Platform as a Service, Big Data and stream data processing
- Strong knowledge of C# language with deep understanding of OOP and SOLID principles.
- Understanding of communication protocols such as LoRaWAN
- Familiar with DevOps tools (Azure DevOps, Jira)
- Strong interest in software engineering, programming and 3D
- Strong desire to work within a fast-paced, constantly ambitious, startup environment
- Self-motivated with the ability to manage time effectively

Interested candidates are requested to send their CV and **copies of all certificates and transcripts** on admin@prodesign.mu

- The company reserves the right to call only the best qualified candidates for the selection exercises.
- Applications received after the closing date will not be considered.
